

Evidence Explained

ESSA emphasizes “evidence-based” approaches that have demonstrated statistically significant positive effect on student outcomes. ESSA identifies four levels of evidence: strong, moderate, promising, and evidence that demonstrates a rationale. The levels are defined by the research study design.

MathXL® for School from Pearson meets ESSA’s “Level 4” evidence criteria

Level 4 Evidence Criteria	Alignment to requirements	Detail
A well-defined logic model or study that indicates how a program is likely to improve student outcomes.	Meets	<p>View the Research Evidence Base</p> <p>10 correlational and case studies on college readiness have been compiled.</p> <p>This research finds that high school students achieve better grades after using MathXL than before they used the program.</p>
